**Version with markings to show changes made**

**In the claims:**

Claims 1 and 4 have been amended as follows:

1. (Amended) A computer-implemented method of providing a graphical user interface (GUI) in a poetry generation system comprising:

displaying a work space;

receiving a user input to the work[d] space; and

linking the user input to the workspace to a plurality of poet assistant windows.

4. (Amended) The computer-implemented method of claim 1 wherein the plurality of poet assistant's windows comprise:

a next word window that shows a next word after the user types a word in the workspace;

a finish line window that shows a completed line after the user types a word in the workspace;

a finish poem window that shows a complete poem after the user types a word in the workspace; and

a rhyme word window that displays a list of words that rhyme with a word found in any of the author analysis models; and

an alliterative window ].
